

## ARTJ1 1 1/2" - 24" Flange Ball Trammels

The Ball Trammel kit. The ball trammels can be utilized up to 300mm on a straight length of bar to measure smaller flanges.

For use with bore mounted machines a light aluminium frame is supplied which spans across the machine base location and can be extended to accommodate the full range of sizes up to a maximum 24" Ring grooves

- RTJ's can be accurately Measured with machine set up
- High tensile Aluminum Frame that provides lightness for feel and has got the rigidity to provide accurate readings
- All parts resistant to oxidation & suitable for outside use.
- Fully adjustable to accommodate all sizes within the scope
- Hardened Balls – 3/16" to 1/2"Ø
- Designed for use with most Flange Facing Machines
- Outside & Inside Measurement
- For use with calibrated Vernier Calipers

The RTJ measuring Kit has a selection of hardened balls to suit size of flange Vernier Calipers 6" & 24"

Extension Plate – 5"

HD Storage & carry case, measuring charts and packing list
